## KO Manufacturing, Inc. Getting trucks clean is kind of our thing!

Truck washes aren't much different than any other business. In order to excel, you must be better and leaner than the guy down the street. Let us show you what KO can do to help improve your cleaning results and lower costs. Give us a call. We look forward to hearing from you!

### DRUM IN A BOX™

Simply add water to any formula in our Drum-in-a-Box™ line to create a professional strength product that is designed for your specific cleaning needs. This line has saved truck wash operators thousands of dollars in freight and chemical usage. Each formula is Biodegradable, VOC Compliant, Easy to Mix, and Stays Stable.

### LIQUID DETERGENTS

KO has had thirty years to fine-tune and perfect our Liquid Fleet Detergent line. We have developed a superior line of Presoaks, Heavy Duty Degreasers, Waxes, Tire & Wheel Cleaners, and products safe for Polished Aluminum. From removing tough road film to stubborn insect residue, KO has a formula that will "get the job done."

### POWDER DETERGENTS

No Fillers. No apologies. KO takes pride in producing the BEST powders on the market. Our stance on product integrity and quality is shown with every truck we get clean. Superior product stability and solubility is what you will find with every powder product we manufacture.

### ALUMINUM BRIGHTENERS

Our Aluminum Brightener products don't simply brighten aluminum—they chemically remove oxide film, light corrosion, road film and diesel smoke from tractor trailers. Unique corrosion inhibitors help prevent flash rusting.

### 2 STEP PRODUCTS

2-Step washing is nothing new. However, since 2-stepping is so reliant on chemistry, KO is constantly releasing new products to make it BETTER. No longer is two-stepping restricted to traditional HF cleaners. *Citri-Brite™* is a formula that uses citrus-based technology and can be used at 80:1.

### RECLAIM DETERGENTS

All of our Reclaimable Detergents are Low Foaming, Biodegradable and Safe in Water Reclaim Units. Quick release properties allow for superior separation of oils to be collected by skimmers. These formulas are much tougher on road film and grime than traditional reclaimable detergents.
